

### Test strips for the qualitative measurement of salts: sulphates, nitrates, chlorides

#### Application

- For determining the presence of salts in the surface
- For the qualitative measurement of sulphates, nitrates or chlorides

#### Properties

- The measurement can be done on site.
- Immediate results.
- Measures the presence or absence of salts. Determining the exact percentage of salts in the surface requires consulting a laboratory.

#### Directions

##### Work method

- Moisten both the surface and the strip with demineralised water.
- Press the reactive side of the strip against the surface.
- One or more squares will change colour if salts are present.
- The amount of salts present can be estimated depending on the speed and intensity of the discolouration.

#### Important remarks

- For a detailed description of this and other measurement methods, please refer to the BBRI's technical information note (NIT/TV) 252 (available in Dutch or French). The salt analysis test strip method is described in paragraph 3.1.4.

Box of 100 test strips

**Safety information – Transport – Handling and storage - Waste**

Consult the most recent and product-related safety information sheet from Rewah in compliance with the (EU) 453/2010 annex II/A guidelines. The information on the abovementioned safety information sheet has been drawn up with the greatest care and is based on the knowledge available at the date of issue. We accept no liability for damage or hindrance of any kind which could be caused by the use of the product concerned.

**Considerations**

The data included in this sheet, the application advices and other recommendations are based on extensive research and experience. They are however not binding also in relation to third party liability. They do not protect the customer against checking the products and directions for their suitability for the purpose. The characteristics and properties described are average values and analyses registered at 20°C, variances are tolerated. Our customer service will gladly answer your questions. The rewrite of this sheet replaces all previous sheets.
