

Biodegradable, concentrated, industrial cleaning agent for facades, floors and other surfaces

Application

- Especially developed especially for the cleaning and the brightening of heavily polluted surfaces
- Removes dirt of different origins like the sediments and stains of mineral, animal and/or vegetable oils and fats, the most diverse atmospheric contaminations, plant growth, food rests, bird droppings, rubber marks, ...
- Perfectly suitable for the cleaning of various materials such as concrete, enamelled bricks, marble, decorative plasterwork, paints, synthetic materials, granitic coatings, metals, ...

Properties

- Concentrate: can be used pure or diluted.
- With a base of biodegradable modified tensioactives and detergents.
- Has a high resolution and acts on the pollution so that the dirt is soaked off the surface in a way that it can be washed down with water.

Directions

Preparation

- Beforehand one has to evaluate the effectiveness of the product by placing a few limited test strips on the surfaces that need to be cleaned. This way you can also determine the product concentration required for your specific application.

Work method

- Apply undiluted, or in the concentration you worked out during the preparation, to the dirtied surfaces by means of a spraying gun, an atomizing device, a brush, ...
- Façades should be treated from bottom to top.
- As soon as the **Omniclean Conc** is applied, scrub in lightly with a brush.
- Allow the product to act on for 5 to 10 minutes, according to the degree of contamination.
- Then clean the surface by means of a powerwash with a rotating head and cold water.
- Hose down the façades, starting at the top, in strips of 20 to 30 cm.
- Subsequently rinse down the façade until the foam has disappeared.
- Then do the same with the underlying area.
- Floors can be cleaned with the aid of a scrub machine.

Important remarks

- Due to possible fading of colors on painted surfaces with the concentrate, test must be done to check for possible fading and hence evaluate the proper dilution ratio.

Technical characteristics

pH	13,2 (conc)
Density	1,03 kg/ltr

Quantity to use

0,075 – 0,150 ltr/m²

Packaging

5 ltr

Safety information – Transport – Handling and storage - Waste

Consult the most recent and product-related safety information sheet from Rewah in compliance with the (EU) 453/2010 annex II/A guidelines. The information on the abovementioned safety information sheet has been drawn up with the greatest care and is based on the knowledge available at the date of issue. We accept no liability for damage or hindrance of any kind which could be caused by the use of the product concerned.

Transport and storage

Transport and store away from frost. Protect the product and its packaging against direct sunlight. Avoid storage at temperatures >30°C.

Storage life

1 year after manufacturing in the original closed packaging.

Considerations

The data included in this sheet, the application advices and other recommendations are based on extensive research and experience. They are however not binding also in relation to third party liability. They do not protect the customer against checking the products and directions for their suitability for the purpose. The characteristics and properties described are average values and analyses registered at 20°C, variances are tolerated. Our customer service will gladly answer your questions. The rewrite of this sheet replaces all previous sheets.
